We Care About Your Dietary Needs

Gluten intolerant people cannot tolerate the gluten protein. When this protein is consumed, the immune system responds by damaging villi, which lines the small intestine and extract nutrients from consumed food. Healthy villi are necessary for absorption of nutrients for good health. It is important for Celiacs to eat **Gluten-Free.**

Villi on the lining of the small intestine helps to absorb nutrients.

Whether you're gluten intolerant or not, there are more and more options for a tasty, healthy gluten-free diet.

Randall's has a Great Selection of Gluten-free Specialty Foods as well as Fresh Fruits and Vegetables, Fresh Meats, and Boars Head Meats & Cheeses ~ **all Gluten-Free!**
